Please specify who owns the copyright for this article

The answer to this question will tell our system whether you are authorized to sign this form yourself, or if you will be required to obtain another signature in order to legally transfer or retain copyright.

☒ Contributor-owned work

This is the correct selection for most authors. It is customary in most academic and healthcare institutions for faculty to retain copyright for articles that they have authored. Please check whether different policies apply in your institution.

☐ U.S. Government work

Applies only if your work was authored as part of your official duties as a United States federal government employee; such works are in the public domain in the US.

☐ U.K. Government work

Applies only to employees of the U.K. Government.

☐ Non-Governmental Organization work

Applies only if the work was carried out during the course of employment by a Non-Governmental Organization.

☐ Other Government work

Applies only to government employees outside of the U.S. and U.K.

☐ Company/institution-owned work

This does not typically apply to most universities and academic institutions. Applies when an organization, often a commercial corporation, owns the copyright of a work either because there is a specific clause in the author's contract of employment that states the company/institution's ownership of its employees' intellectual property, or it has been contracted ('made for hire').

Wiley has an agreement with your institution, Chinese University of Hong Kong, to cover eligible open access article publication charges (APC) for their affiliated authors. Visit our [Affiliation Policies & Payments](#) page to find out what type of APC coverage is available from your institution.

Make your article freely available for everyone to read, copy, distribute and share.

Publishing open access:

- Enables the greatest possible readership and multidisciplinary influence
- Allows your article to be cited widely and achieve the greatest possible impact in your field
- Complies with open access mandates - retain copyright and choose a Creative Commons license
