

Practical course on Fishing Methods in freshwaters

Lipno Reservoir September 12-16. 2022 (just before PERCIS IS)

Ecological and sustainable fishing in free, untamed waters for regulation and monitoring fish communities is still a challenge, especially in freshwaters. It places high demands on manpower and technical equipment. With the decline of commercial fisheries in most parts of Europe much knowledge may be forgotten or lost. This course will present the experience gained in Czech water reservoirs during the project Biomanipulation as a tool for the improvement of reservoir water quality supported by the European Union within ESIF in frame of Operational Program Research, Development and Education (project no. CZ.02.1.01/0.0/0.0/16_025/0007417). Lectures and practical demonstrations will include trawling, seining, electrofishing and use of fyke nets and traps.

Registration contact michaela.holubova@hbu.cas.cz

Please state your name, surname, company and contacts (mobile, e-mail) in the application.

Participation is free of charge, but the number of participants is limited to 15. The event will take place in the lounge of the Hotel Racek in Černá v Pošumaví and practical demonstrations on the reservoir itself. Book your stay as soon as possible at: <https://www.hotel-racek.cz/>
Lipno reservoir is a popular tourist destination, so it is necessary to book your stay in time!
